

PharmaAI — Architecture & Workflow Diagram

Pharmaceutical Agreement OCR to Invoice Drafting Platform • End-to-End System Pipeline

System Component Specification & Rule Mapping

Technical reference for each stage in the PharmaAI data processing pipeline

Stage	Component / Service	Key Responsibilities & Logic
1. Ingestion	Frontend UI (React + Vite)	• Drag-and-drop agreement/SOW/Quotation PDFs • Instant test samples loaded with real binary files from backend • Submits multipart/form-data to /api/extract
2. AI Extraction	Azure Document Intelligence + Azure OpenAI (gpt-5.2)	• prebuilt-layout extracts tables, structures, and text • Azure OpenAI parses commercial clauses into strict ExtractedAgreement JSON schema (Client, Milestones, Currency, CRO)
3. Review & Config	ExtractionViewer & InvoiceDraftForm	• User verifies extracted study title, parties, and milestones • Selects target milestone (e.g., Milestone 2/2) • Configures billing date, Buyer PO, and forex rate to INR
4. Business Rules	Pharmazone Invoice Engine (Python Backend)	• Department: CR (GCP), GM (GMP Audits), RA (Regulatory) • HSN/SAC: Uniform 998113 • Bank Selection: USD (50200002488742), EUR (16792440000012), INR (16792320000205) • Tax: Export 0% IGST under LUT vs Domestic 18% GST (9% CGST + 9% SGST) • Reference: <Project_ID> <M>/<Total> dt. <Date>
5. Invoice Output	InvoicePreview & Print Stylesheet	• Renders exact Pharmazone export/tax invoice format • Pixel-perfect A4 printable layout (Ctrl+P / Save as PDF) • Saves generated drafts to in-memory history repository
