

		
Quotation - Independent Monitoring Services		
Vendor Name	Pharmazone	
Client Name	Pharmaris Canada Inc., Canada	
Name of Contact Person	Mr. Deepak Sehajpaul - deepak@pharmaris.com	
Date of Proposal	24-Mar-2026 - D02	
Study Details	A double blinded, balanced, randomized, single dose, two-treatment, two-sequence, two-period, cross over, oral bioequivalence study Comparing PrpRZ-ESOMEPRAZOLE (Esomeprazole Magnesium Delayed Release Tablets 40mg) with P1NEXIUM® Esomeprazole Delayed release tablets 40 mg in healthy, adult, human subjects under fasting conditions	
CRO - Name and Location	VerGo Pharma Research Pvt. Ltd., Goa	
Pilot/Pivotal	Pivotal	
Total No of Subjects	40	
Total No of Period	02 Periods	
CRO Protocol No.	071-25	
Detailed Scope of Work	As stated below	

Task	Scope of work	When?
Interim Site Monitoring Visit	- Reporting of Volunteers	Period - 01 Period - 02
	- Informed Consent & related procedures	
	- Investigator File/Trial Master File/e-TMF Review – Open points from SIV or last visit	
	- Check-In activities as per protocol	
	- Admission to Clinic	
	- Clinic readiness for emergency management	
	- Inclusion/Exclusion criteria & Eligibility	
	- Dispensing activities	
	- Verification of IMPs and Storage Condition of IMPs	
	- Instructions as per IMP Manual	
	- Temperature & Humidity of Pharmacy Area	
	- Randomization & Coding Procedures	
	- Pre-Dose eligibility	
	- Dosing	
	- Vitals and Meals	
Interim Monitoring Visit – In Process BA Monitoring - IPBA	- SAE/AE Management and reporting	During on-going bioanalysis of the study samples
	- PK sampling and processing	
	- Review of protocol	
	- Review of sample receipt details	
	- Method SOP review	
	- Method Validation Report review	
	- Bioanalytical Study Plan review (if applicable)	
	- Review of training and delegation of personnel involved in the study (Including personnel training records)	
	- GCP/GLP Training to employees	
	- Biomedical Waste Handling training to the employees	
	- Review of Stock weighing and working solution preparation (Including Reference/ Working Standard COA check along with its storage and consumption record check)	
	- Acquisition method check	
	- Blank matrix screening and bulk spiking review (Including Bulk spike assessment)	
	- In-processing batch details [Every step from sample withdrawal y to the completion of a batch]	
	- Calibration of all instruments and available raw data check	
Interim Monitoring Visit – Retrospective BA Monitoring - RTBA	- Protocol details Check	After preparation of draft bioanalytical report
	- Review of protocol	
	- Review of sample receipt details	
	- Method SOP review	
	- Method Validation Report review	
	- Bioanalytical Study Plan review (if applicable)	
	- Review of training and delegation of personnel involved in the study (Including personnel training records)	
	- GCP/GLP Training to employees	
	- Biomedical Waste Handling training to the employees	
	- Review of Stock weighing and working solution preparation (Including Reference/ Working Standard COA check along with its storage and consumption record check)	
	- Acquisition methods check	
	- Blank matrix screening and bulk spiking review (Including Bulk spike assessment)	
	- Review of subject sample batches raw data including batch processing documents, chromatograms, audit trails, Internal standard variation, etc.	
	- Repeat analysis and Incurred Sample Re-analysis check	
	- Review of Incidents/Re-injections or Batch Failures & Deviation (if any)	
Site Close Out Visit	- Draft bioanalytical report review	When draft study report is ready
	- Calibration of all instruments and available raw data check	
	- Review of final study concentration data	
	- Trial Master File (Completion of Visits of all subjects, Final Check of TMF, Closure of All Observations and Verification of CAPA, Check for reconciliation of controlled forms, Monitoring Visit Log)	
	- Study Data (Completion and correctness in Case Report Forms, Screening Forms, Consent Forms)	
	- Enrollment log	
	- IMP accountability	
	- Reconciliation of bioanalytical samples and shipment to BA labs	
	- All Adverse Events (AEs)/Serious Adverse Events (SAEs)/Unanticipated Problems (UPs) have been entered, events resolved, follow-up completed, and documentation reconciled.	
	- Site Closeout Meeting	

Project Cost			
Task	Type of visit	Days of Monitoring	Charges (USD)
Clinical & Bioanalytical Phase Monitoring	Interim Monitoring Visit – Period 01 (Dosing & Check-out)	2	\$ 3,600
	Interim Monitoring Visit – Period 02 (Check-in & Dosing)	2	
	In-process BA monitoring	2	
	Retrospective BA monitoring	2	
	Site close-out visit	1	
Special Discount (USD)		9	\$ 450
Final Price (USD)			\$ 3,150

Assumptions:

- The Project cost estimation has been calculated on the basis of the information provided by the sponsor.
- As per the change in the study specifications, there would be change in the estimation also.
- Costing provided includes all lodging, boarding & miscellaneous charges during entire project monitoring.
- Scope of Work is just to give primary idea about activities going to be performed during Monitoring.
- Only 01 monitor will participate for single day of monitoring.
- This proposal is valid for 45 days upon submission.
- Any Invoices are to be paid within 30 days of Invoice effective date.

Payment Schedule:

(a) 1st payment: Sponsor will pay Pharmazone 50% of total Service Fee, within 30 working days after the date of the agreement signing/ Proposal signing/ PO issuance and for kick start activities.

(b) 2nd payment: Sponsor will pay Pharmazone 50% of total Service Fee, within 30 working days after completion of last Monitoring visit.

Cancellation charges:

- (a) If Sponsor cancels Project once PA is duly executed & before start of 1st Dosing activity, 30% of Total PA value will be charged as cancellation fee in order to compensate efforts put in already for planning and execution.
- (b) If Sponsor cancels Project after the start of 1st Dosing activity, total service fees would be charged.
